Your search matched **190** of **990895** documents.

A maximum of **190** results are displayed, **50** to a page, sorted by **publication year** in **ascending** order.
You may refine your search by editing the current search expression or entering a new one the text box.
Then click **Search Again**.

specification and control* and program* and automa | Search Again |

Results:
Journal or Magazine = **JNL**   Conference = **CNF**   Standard = **STD**

---

1 **An algorithm for stochastic control through dynamic programming techniques**
Chen, P.;
Automatic Control, IRE Transactions on , Volume: 7 Issue: 5 , Oct 1962
Page(s): 110 -119

[Abstract]   [PDF Full-Text (704 KB)] **IEEE JNL**

---

2 **Vapor jet control of space vehicles**
Vaeth, J.;
Automatic Control, IRE Transactions on , Volume: 7 Issue: 5 , Oct 1962
Page(s): 67 -74

[Abstract]   [PDF Full-Text (768 KB)] **IEEE JNL**

---

3 **Real-Time Testing of Automatic Overload Control Systems in a Laboratory Environment**
Man, F.;
Communications, IEEE Transactions on [legacy, pre - 1988] , Volume: 21 Issue: 9 , Sep 1973
Page(s): 1027 -1031

[Abstract]   [PDF Full-Text (520 KB)] **IEEE JNL**

---

4 **An approach to on-line power dispatch with ambient air pollution constraints**
Kai-Ching Chu; Jamshidi, M.; Levitan, R.;
Automatic Control, IEEE Transactions on , Volume: 22 Issue: 3 , Jun 1977
Page(s): 385 -396

[Abstract] [PDF Full-Text (1008 KB)] **IEEE JNL**

---

5 **SL1 Language--A Specification and Design To l f r Switching Systems Software Devel pment**
Exel, M.; Popovic, B.; Prijatelj, F.;
Communications, IEEE Transactions on [legacy, pre - 1988] , Volume: 30 Issue: 6 , Jun 1982
Page(s): 1356 -1362

[Abstract] [PDF Full-Text (712 KB)] **IEEE JNL**

---

6 **Application of a commercial data base management system to memory device test program generation and debugging**
Grennan, S.;
Test Conference, 1988. Proceedings. 'New Frontiers in Testing'., International , 12-14 Sept. 1988
Page(s): 289 -294

[Abstract] [PDF Full-Text (432 KB)] **IEEE CNF**

---

7 **Development of a manufacturing workcell management system**
Chen, P.; Benhabib, B.; Johnson, W.R.;
Programmable Control and Automation Technology Conference and Exhibition, 1988. Conference Proceedings., Fourth Annual Canadian , 12-13 Oct. 1988
Page(s): 13A2 -12/1-6

[Abstract] [PDF Full-Text (424 KB)] **IEEE CNF**

---

8 **STATEMATE: a working environment for the development of complex reactive systems**
Harel, D.; Lachover, H.; Naamad, A.; Pnueli, A.; Politi, M.; Sherman, R.; Shtul-Trauring, A.;
Computer Systems and Software Engineering, 1988. Proceedings., Third Israel Conference on , 6-7 June 1988
Page(s): 1 -3

[Abstract] [PDF Full-Text (256 KB)] **IEEE CNF**

---

9 **A dynamically evolving learning network for intelligent control**
Crosscope, J.R.; Bonnell, R.D.;
Intelligent Control, 1988. Proceedings., IEEE International Symposium on , 24-26 Aug. 1988
Page(s): 529 -533

[Abstract] [PDF Full-Text (388 KB)] **IEEE CNF**

---

10 **UBIST version of the SYCO's control section compiler**
Torki, K.; Nicolaidis, M.; Jerraya, A.A.; Courtois, B.;
Computer Design: VLSI in Computers and Processors, 1988. ICCD '88.,
Proceedings of the 1988 IEEE International Conference on , 3-5 Oct. 1988
Page(s): 392 -396

[Abstract]   [PDF Full-Text (432 KB)] **IEEE CNF**

11 **Automating diagnosis at the communication structure level [expert systems]**
Ramakrishna, K.;
Communications, 1988. ICC 88. Digital Technology - Spanning the Universe.
Conference Record. IEEE International Conference on , 12-15 June 1988
Page(s): 1459 -1466 vol.3

[Abstract]   [PDF Full-Text (500 KB)] **IEEE CNF**

12 **Artificial intelligence based programmable controller software designing**
Ono, Y.; Tanimoto, I.; Matsudaira, T.; Takeuchi, Y.;
Artificial Intelligence for Industrial Applications, 1988. IEEE AI '88., Proceedings
of the International Workshop on , 25-27 May 1988
Page(s): 85 -90

[Abstract]   [PDF Full-Text (472 KB)] **IEEE CNF**

13 **Extending the RCCL programming environment to multiple robots and processors**
Lloyd, J.; Parker, M.; McClain, R.;
Robotics and Automation, 1988. Proceedings., 1988 IEEE International
Conference on , 24-29 April 1988
Page(s): 465 -469 vol.1

[Abstract]   [PDF Full-Text (380 KB)] **IEEE CNF**

14 **Generating multitasking Ada programs from high-level specifications**
Shi, Y.; Prywes, N.;
Ada Applications and Environments, 1988., Third International IEEE Conference
on , 23-25 May 1988
Page(s): 137 -149

[Abstract]   [PDF Full-Text (668 KB)] **IEEE CNF**

15 **Automated generati n and evaluation of control programs for discrete manufacturing processes**
Krogh, B.H.; Willson, R.; Pathak, D.;
Computer Integrated Manufacturing, 1988., International Conference on , 23-25
May 1988
Page(s): 92 -99

[Abstract]   [PDF Full-Text (676 KB)] **IEEE CNF**

16 **STATEMATE: a working environment for the development of complex reactive systems**
Harel, D.; Lachover, H.; Naamad, A.; Pnueli, A.; Politi, M.; Sherman, R.; Shtul-Trauring, A.;
Software Engineering, 1988., Proceedings of the 10th International Conference on , 11-15 April 1988
Page(s): 396 -406

[Abstract]   [PDF Full-Text (808 KB)] **IEEE CNF**

17 **G++, a graphical language intended to help the development of industrial process control applications**
Fanard, A.G.; Lobelle, M.C.; Mulemangabo, E.B.;
Software Engineering for Real Time Systems, 1989., Second International Conference on , 18-20 Sep 1989
Page(s): 85 -89

[Abstract]   [PDF Full-Text (384 KB)] **IEE CNF**

18 **Computer-aided robustness analysis for characteristic polynomials with polynomial parameter dependence**
Ackermann, J.; Sienel, W.;
Decision and Control, 1989., Proceedings of the 28th IEEE Conference on , 13-15 Dec. 1989
Page(s): 1934 -1935 vol.3

[Abstract]   [PDF Full-Text (244 KB)] **IEEE CNF**

19 **NAVASTIR III software specification tool**
Benjamin, M.K.; Six, F.B.;
Aerospace and Electronics Conference, 1989. NAECON 1989., Proceedings of the IEEE 1989 National , 22-26 May 1989
Page(s): 1970 -1976 vol.4

[Abstract]   [PDF Full-Text (376 KB)] **IEEE CNF**

20 **The INMOS integrated parametric test and analysis system**
Cheung, D.; Clark, A.; Starr, R.;
Microelectronic Test Structures, 1989. ICMTS 1989. Proceedings of the 1989 International Conference on , 13-14 March 1989
Page(s): 45 -50

[Abstract]   [PDF Full-Text (464 KB)] **IEEE CNF**

21 **R botic task planning: independent of agents but dependent on time**
Davis, W.S.;
Robotics and Automation, 1989. Proceedings., 1989 IEEE International
Conference on , 14-19 May 1989
Page(s): 690 -1+4 vol.2

[Abstract] [PDF Full-Text (568 KB)] **IEEE CNF**

---

22 **Specification and generation of a motion path for compliant motion**
Sawada, C.; Ishikawa, H.; Kawase, K.; Takata, M.;
Robotics and Automation, 1989. Proceedings., 1989 IEEE International
Conference on , 14-19 May 1989
Page(s): 808 -816 vol.2

[Abstract] [PDF Full-Text (544 KB)] **IEEE CNF**

---

23 **Design specification in Japan: tree-structured charts**
Aoyama, M.; Miyamoto, K.; Murakami, N.; Nagano, H.; Oki, Y.;
Software, IEEE , Volume: 6 Issue: 2 , March 1989
Page(s): 31 -37

[Abstract] [PDF Full-Text (608 KB)] **IEEE JNL**

---

24 **COMPASS '90. Proceedings of the Fifth Annual Conference on
Computer Assurance. Systems Integrity, Software Safety and Process
Security. (Cat. No.90CH2830-8)**
Computer Assurance, 1990. COMPASS '90, 'Systems Integrity, Software Safety
and Process Security'., Proceedings of the Fifth Annual Conference on , 25-28
June 1990

[Abstract] [PDF Full-Text (20 KB)] **IEEE CNF**

---

25 **IIDAT-an intelligent interface design automation tool**
Hsu, Y.-H.; Kuo, Y.-H.;
TENCON 90. 1990 IEEE Region 10 Conference on Computer and Communication
Systems , 24-27 Sept. 1990
Page(s): 705 -707 vol.2

[Abstract] [PDF Full-Text (220 KB)] **IEEE CNF**

---

26 **A methodology and environment for the object oriented analysis and
design of real time systems**
Baldassari, M.; Bruno, G.;
Real Time, 1990. Proceedings., Euromicro '90 Workshop on , 6-8 June 1990
Page(s): 72 -78

[Abstract] [PDF Full-Text (600 KB)] **IEEE CNF**

---

27 **Layered service software generation based n service description procedures**
Mizuno, O.; Niitsu, Y.;
Communications, 1990. ICC 90, Including Supercomm Technical Sessions.
SUPERCOMM/ICC '90. Conference Record., IEEE International Conference on ,
16-19 April 1990
Page(s): 331 -335 vol.2

[Abstract] [PDF Full-Text (392 KB)] **IEEE CNF**

28 **A multi-level man-machine interface for specification of test scenarios in intelligent network systems**
Breidenstein, C.J.;
Communications, 1990. ICC 90, Including Supercomm Technical Sessions.
SUPERCOMM/ICC '90. Conference Record., IEEE International Conference on ,
16-19 April 1990
Page(s): 218 -222 vol.1

[Abstract] [PDF Full-Text (420 KB)] **IEEE CNF**

29 **An application generator for a family of real-time monitor and control systems**
Benaya, T.; Yehudai, A.;
CompEuro '90. Proceedings of the 1990 IEEE International Conference on
Computer Systems and Software Engineering , 8-10 May 1990
Page(s): 274 -279

[Abstract] [PDF Full-Text (388 KB)] **IEEE CNF**

30 **Rapid prototyping through graphical operational specification and automated code generation**
Zompi, R.; Russi, V.;
CompEuro '90. Proceedings of the 1990 IEEE International Conference on
Computer Systems and Software Engineering , 8-10 May 1990
Page(s): 509 -517

[Abstract] [PDF Full-Text (684 KB)] **IEEE CNF**

31 **Automated code generation for application engineers [avionics]**
Turkovich, J.J.;
Digital Avionics Systems Conference, 1990. Proceedings., IEEE/AIAA/NASA 9th ,
15-18 Oct. 1990
Page(s): 616 -627

[Abstract] [PDF Full-Text (664 KB)] **IEEE CNF**

32 **A layer-3 conformance test method f r HBS**
Hamabe, R.; Murata, M.; Namekawa, T.; Tatematsu, K.; Watanabe, Y.; Iida, K.; Kumagai, A.;

Consumer Electronics, IEEE Transactions on , Volume: 36 Issue: 4 , Nov 1990
Page(s): 807 -812

[Abstract] [PDF Full-Text (352 KB)] **IEEE JNL**

---

33 An efficient representation for linear constraints
Tebbutt, C.D.;
Automatic Control, IEEE Transactions on , Volume: 35 Issue: 8 , Aug. 1990
Page(s): 949 -951

[Abstract] [PDF Full-Text (264 KB)] **IEEE JNL**

---

34 Synthesis of a control unit from instruction set specification in VHDL environment
Muralidhar, K.R.; Mahabala, H.N.;
VLSI Design, 1991. Proceedings., Fourth CSI/IEEE International Symposium on ,
4-8 Jan. 1991
Page(s): 200 -205

[Abstract] [PDF Full-Text (368 KB)] **IEEE CNF**

---

35 Validation of Motif graphical user interface widget set
Birjandi, A.; Sydorowicz, S.;
System Sciences, 1991. Proceedings of the Twenty-Fourth Annual Hawaii
International Conference on , Volume: ii , 8-11 Jan. 1991
Page(s): 102 -103 vol.2

[Abstract] [PDF Full-Text (136 KB)] **IEEE CNF**

---

36 Automatic computation of Z and inverse Z transformations by MAPLE
Wang, R.; Woo, P.-Y.;
Industrial Electronics, Control and Instrumentation, 1991. Proceedings. IECON
'91., 1991 International Conference on , 28 Oct.-1 Nov. 1991
Page(s): 1092 -1094 vol.2

[Abstract] [PDF Full-Text (172 KB)] **IEEE CNF**

---

37 An automatic test program generator
Ogata, T.; Ono, T.; Watanabe, T.; Ito, K.;
Industrial Electronics, Control and Instrumentation, 1991. Proceedings. IECON
'91., 1991 International Conference on , 28 Oct.-1 Nov. 1991
Page(s): 1372 -1374 vol.2

[Abstract] [PDF Full-Text (180 KB)] **IEEE CNF**

---

38 **Programming reactive systems with statecharts**
Gregoire, J.-C.; Makowsky, J.A.; Levin, S.E.;
Computer Systems and Software Engineering, 1991. Proceedings., Fifth Israel
Conference on , 28-29 May 1991
Page(s): 87 -103

[Abstract] [PDF Full-Text (836 KB)] **IEEE CNF**

39 **A concurrent approach to systems development and requirements
specifications: a case study**
Winokur, M.; Engel, A.; Gallant, R.;
Computer Systems and Software Engineering, 1991. Proceedings., Fifth Israel
Conference on , 28-29 May 1991
Page(s): 13 -19

[Abstract] [PDF Full-Text (440 KB)] **IEEE CNF**

40 **A MAP-to-Data Highway implementation using MMS**
King, M.S.; Bishop, A.O., Jr.;
Southeastcon '91., IEEE Proceedings of , 7-10 April 1991
Page(s): 442 -443 vol.1

[Abstract] [PDF Full-Text (156 KB)] **IEEE CNF**

41 **KMDS: an expert system for integrated hardware/software design of
microprocessor-based digital systems**
*Yau-Hwang Kuo; Ling-Yang Kung; Ching-Chung Tzeng; Guang-Huei Jeng;
Wei-Kuo Chia;*
Micro, IEEE , Volume: 11 Issue: 4 , Aug. 1991
Page(s): 32 -35, 86-92

[Abstract] [PDF Full-Text (916 KB)] **IEEE JNL**

42 **Test-case generation from Prolog-based specifications**
Denney, R.;
Software, IEEE , Volume: 8 Issue: 2 , March 1991
Page(s): 49 -57

[Abstract] [PDF Full-Text (884 KB)] **IEEE JNL**

43 **Behavioral design and test assistance for pipelined processors**
Iwashita, H.; Nakata, T.; Hirose, F.;
Test Symposium, 1992. (ATS '92), Proceedings., First Asian (Cat. No.TH0458-0) ,
26-27 Nov. 1992
Page(s): 8 -13

[Abstract] [PDF Full-Text (420 KB)] **IEEE CNF**

44 Fingerlike biomechanical robots
Deno, D.C.; Murray, R.M.; Pister, K.S.J.; Sastry, S.S.;
Robotics and Automation, 1992. Proceedings., 1992 IEEE International
Conference on , 12-14 May 1992
Page(s): 566 -572 vol.1

[Abstract] [PDF Full-Text (628 KB)] **IEEE CNF**

---

45 Automatic production of NC code for machining form features in generic parts
Masotti, G.; Bombardi, T.;
Computing & Control Engineering Journal , Volume: 3 Issue: 6 , Nov. 1992
Page(s): 287 -295

[Abstract] [PDF Full-Text (1980 KB)] **IEE JNL**

---

46 Descent algorithms for optimal periodic output feedback control
Hyslop, G.L.; Schattler, H.; Tarn, T.-J.;
Automatic Control, IEEE Transactions on , Volume: 37 Issue: 12 , Dec. 1992
Page(s): 1893 -1904

[Abstract] [PDF Full-Text (988 KB)] **IEEE JNL**

---

47 A new NFA algorithm for SPC switching systems
Wanq Yingxu; Wei Jia;
TENCON '93. Proceedings. Computer, Communication, Control and Power
Engineering.1993 IEEE Region 10 Conference on Issue: 0 , 19-21 Oct. 1993
Page(s): 609 -612 vol.3

[Abstract] [PDF Full-Text (124 KB)] **IEEE CNF**

---

48 ASSYNT: efficient assembly code generation for digital signal processors starting from a data flowgraph
Desmet, D.; Genin, D.;
Acoustics, Speech, and Signal Processing, 1993. ICASSP-93., 1993 IEEE
International Conference on , Volume: 3 , 27-30 April 1993
Page(s): 45 -48 vol.3

[Abstract] [PDF Full-Text (320 KB)] **IEEE CNF**

---

49 Communication software generation based on two-layered specifications and execution environment
Takura, A.; Kawata, K.; Ohta, T.; Terashima, N.;
Global Telecommunications Conference, 1993, including a Communications
Theory Mini-Conference. Technical Program Conference Record, IEEE in Houston.
GLOBECOM '93., IEEE , 29 Nov.-2 Dec. 1993
Page(s): 362 -368 vol.1

[Abstract]   [PDF Full-Text (508 KB)] **IEEE CNF**

---

50 **Programmable factory IC manufacturing for the 21st century**
Saraswat, K.C.;
Semiconductor Manufacturing Science Symposium, 1993. ISMSS 1993.,
IEEE/SEMI International , 19-20 July 1993
Page(s): 2 -6

[Abstract]   [PDF Full-Text (460 KB)] **IEEE CNF**

Results:
Journal or Magazine = **JNL**   Conference = **CNF**   Standard = **STD**

---

51 **A Petri-net-based approach to real-time program analysis**
Buy, U.; Sloan, R.;
Software Specification and Design, 1993., Proceedings of the Seventh International Workshop on , 6-7 Dec 1993
Page(s): 56 -60

[Abstract]   [PDF Full-Text (404 KB)] **IEEE CNF**

---

52 **Collision-free trajectory planning for two manipulators using virtual coordination space**
Mohri, A.; Yamamoto, M.; Marushima, S.;
Robotics and Automation, 1993. Proceedings., 1993 IEEE International Conference on , 2-6 May 1993
Page(s): 674 -679 vol.2

[Abstract]   [PDF Full-Text (304 KB)] **IEEE CNF**

---

53 **Planning time-optimal trajectory for coordinated robot arms**
Wang, F.-Y.; Pu, B.;
Robotics and Automation, 1993. Proceedings., 1993 IEEE International Conference on , 2-6 May 1993
Page(s): 245 -250 vol.1

[Abstract]   [PDF Full-Text (456 KB)] **IEEE CNF**

---

54 **The MODES Global Control Environment - A tool for rapid prototyping**
Munk, C.; Ukelo, P.; Vachoux, A.; Mlynek, D.;
Design Automation Conference, 1993, with EURO-VHDL '93. Proceedings EURO-DAC '93. European , 20-24 Sept. 1993
Page(s): 338 -343

[Abstract] [PDF Full-Text (624 KB)] **IEEE CNF**

---

55 **The concept of superprocesses for high-level synthesis and their VHDL m delling**
Keresztes, P.; Agotai, I.;
Design Automation Conference, 1993, with EURO-VHDL '93. Proceedings
EURO-DAC '93. European , 20-24 Sept. 1993
Page(s): 480 -485

[Abstract] [PDF Full-Text (252 KB)] **IEEE CNF**

---

56 **Conceptual design of test aides for flight critical control systems**
Houchard, J.H.;
Aerospace and Electronics Conference, 1994. NAECON 1994., Proceedings of the
IEEE 1994 National , 23-27 May 1994
Page(s): 911 -918 vol.2

[Abstract] [PDF Full-Text (632 KB)] **IEEE CNF**

---

57 **A high-level object-oriented programmable controller programming interface**
Duran, O.M.; Batocchio, A.;
Industrial Electronics, 1994. Symposium Proceedings, ISIE '94., 1994 IEEE
International Symposium on , 25-27 May 1994
Page(s): 226 -230

[Abstract] [PDF Full-Text (416 KB)] **IEEE CNF**

---

58 **Self testable boards with standard IEEE 1149.5 module test and maintenance (MTM) bus interface**
Haberl, O.F.; Kropf, T.;
European Design and Test Conference, 1994. EDAC, The European Conference on
Design Automation. ETC European Test Conference. EUROASIC, The European
Event in ASIC Design, Proceedings. , 28 Feb.-3 March 1994
Page(s): 220 -225

[Abstract] [PDF Full-Text (480 KB)] **IEEE CNF**

---

59 **High quality automatic code generation for control applications**
Englehart, M.;
Computer-Aided Control System Design, 1994. Proceedings., IEEE/IFAC Joint
Symposium on , 7-9 March 1994
Page(s): 363 -367

[Abstract] [PDF Full-Text (312 KB)] **IEEE CNF**

---

60 A prototype framework f design to ls for computer-aided c ntrol engineering
Browne, A.R.; Bass, J.M.; Croll, P.R.; Fleming, P.J.;
Computer-Aided Control System Design, 1994. Proceedings., IEEE/IFAC Joint Symposium on , 7-9 March 1994
Page(s): 369 -374

[Abstract] [PDF Full-Text (396 KB)] **IEEE CNF**

61 An interface for numerical analysis of convective heat transfer from printed circuit boards
Ma, Y.;
Electronic Components and Technology Conference, 1994. Proceedings., 44th , 1-4 May 1994
Page(s): 653 -658

[Abstract] [PDF Full-Text (528 KB)] **IEEE CNF**

62 A generic kinematics software package
Ramadorai, A.K.; Ganapathy, U.; Guida, F.;
Robotics and Automation, 1994. Proceedings., 1994 IEEE International Conference on , 8-13 May 1994
Page(s): 3331 -3336 vol.4

[Abstract] [PDF Full-Text (448 KB)] **IEEE CNF**

63 VORTEX-PILOT: a top-down approach for AUVs mission telerobotics language
Le Rest, E.; Marce, L.; Rigaud, V.;
OCEANS '94. 'Oceans Engineering for Today's Technology and Tomorrow's Preservation.' Proceedings , Volume: 2 , 13-16 Sept. 1994
Page(s): II/102 -II/107 vol.2

[Abstract] [PDF Full-Text (488 KB)] **IEEE CNF**

64 Advanced mixed signal testing by synchronized control and real-time DSP
Hiwada, K.; Maeda, A.; Karube, K.; Gunji, K.;
Instrumentation and Measurement Technology Conference, 1994. IMTC/94. Conference Proceedings. 10th Anniversary. Advanced Technologies in I & M., 1994 IEEE , 10-12 May 1994
Page(s): 1466 -1471 vol.3

[Abstract] [PDF Full-Text (416 KB)] **IEEE CNF**

65 Supporting systems engineering with methods and tools: a case study
Rader, J.; Haggerty, L.;
Signals, Systems and Computers, 1994. 1994 Conference Record of the Twenty-Eighth Asilomar Conference on , Volume: 2 , 31 Oct.-2 Nov. 1994

Page(s): 1330 -1334 vol.2

[Abstract]   [PDF Full-Text (492 KB)] **IEEE CNF**

---

66 **Planning-based visual programming for sequence control**
Namioka, Y.; Tsukimoto, H.; Ito, S.; Mizutani, H.; Matsudaira, T.;
Emerging Technologies and Factory Automation, 1994. ETFA '94., IEEE
Symposium on , 6-10 Nov. 1994
Page(s): 330 -337

[Abstract]   [PDF Full-Text (480 KB)] **IEEE CNF**

---

67 **The automatic generating of software for monitoring and control
systems**
Timko, J.; Haluskova, M.; Haluska, J.; Harcarufka, R.;
Industrial Electronics, Control and Instrumentation, 1994. IECON '94., 20th
International Conference on , Volume: 3 , 5-9 Sept. 1994
Page(s): 1799 -1801 vol.3

[Abstract]   [PDF Full-Text (248 KB)] **IEEE CNF**

---

68 **Automatic generation of Petri net models from logic control
specifications**
Venkatesh, K.; MengChu Zhou; Caudill, R.;
Computer Integrated Manufacturing and Automation Technology, 1994.,
Proceedings of the Fourth International Conference on , 10-12 Oct. 1994
Page(s): 242 -247

[Abstract]   [PDF Full-Text (456 KB)] **IEEE CNF**

---

69 **Development of an advanced industrial metal detector
instrumentation**
Gray, J.;
Computing & Control Engineering Journal , Volume: 5 Issue: 3 , June 1994
Page(s): 117 -120

[Abstract]   [PDF Full-Text (312 KB)] **IEE JNL**

---

70 **Real-time software testing for microprocessor-based protective relays**
Santoso, N.I.; Avins, J.Y.;
Power Delivery, IEEE Transactions on , Volume: 9 Issue: 3 , July 1994
Page(s): 1359 -1367

[Abstract]   [PDF Full-Text (804 KB)] **IEEE JNL**

---

71 **Automating the devel pment of distributed control software**
Bass, J.M.; Brown, A.R.; Hajji, M.S.; Marriott, D.G.; Croll, P.R.; Fleming, P.J.;
Parallel & Distributed Technology: Systems & Applications, IEEE [see also IEEE Concurrency] , Volume: 2 Issue: 4 , Winter 1994
Page(s): 9 -19

[Abstract] [PDF Full-Text (888 KB)] **IEEE JNL**

72 **Safety assurance in process control**
Halang, W.A.; Kramer, B.J.;
Software, IEEE , Volume: 11 Issue: 1 , Jan. 1994
Page(s): 61 -67

[Abstract] [PDF Full-Text (800 KB)] **IEEE JNL**

73 **Graphical modelling and design with automatic code generation**
Smith, M.;
Partitioning in Hardware-Software Codesigns, IEE Colloquium on , 13 Feb 1995
Page(s): 8/1 -8/4

[Abstract] [PDF Full-Text (252 KB)] **IEE CNF**

74 **Optimum wordlength determination of 8×8 IDCT architectures conforming to the IEEE standard specifications**
Seehyun Kim; Wonyong Sung;
Signals, Systems and Computers, 1995. 1995 Conference Record of the Twenty-Ninth Asilomar Conference on , Volume: 2 , 30 Oct.-2 Nov. 1995
Page(s): 821 -825 vol.2

[Abstract] [PDF Full-Text (344 KB)] **IEEE CNF**

75 **Model-based programming and diagnosis for programmable logical controllers**
Lemmer, K.; Ober, B.; Schnieder, E.;
Systems, Man and Cybernetics, 1995. 'Intelligent Systems for the 21st Century'., IEEE International Conference on , Volume: 5 , 22-25 Oct. 1995
Page(s): 4474 -4479 vol.5

[Abstract] [PDF Full-Text (648 KB)] **IEEE CNF**

76 **Automatic generation of C++ code from an ESCRO2 specification**
Grabow, P.C.; Liu, L.;
Computer Software and Applications Conference, 1995. COMPSAC 95. Proceedings., Nineteenth Annual International , 9-11 Aug. 1995
Page(s): 18 -24

[Abstract] [PDF Full-Text (492 KB)] **IEEE CNF**

77 Real-time multi-tasking in s ftware synthesis for information processing systems
Thoen, F.; Cornero, M.; Goossens, G.; De Man, H.;
System Synthesis, 1995., Proceedings of the Eighth International Symposium on , 13-15 Sept. 1995
Page(s): 48 -53

[Abstract]   [PDF Full-Text (688 KB)] **IEEE CNF**

78 Automatic bus routing and passenger geocoding with a geographic information system
Yue-Hong Chou;
Vehicle Navigation and Information Systems Conference, 1995. Proceedings. In conjunction with the Pacific Rim TransTech Conference. 6th International VNIS. 'A Ride into the Future' , 30 July-2 Aug. 1995
Page(s): 352 -359

[Abstract]   [PDF Full-Text (712 KB)] **IEEE CNF**

79 An environment to ease the use of MMS
Mammeri, Z.; Akazan, J.;
Real-Time Systems, 1995. Proceedings., Seventh Euromicro Workshop on , 14-16 June 1995
Page(s): 132 -138

[Abstract]   [PDF Full-Text (508 KB)] **IEEE CNF**

80 Design of an integrated service creation environment for the advanced intelligent network
Niitsu, Y.; Mizuno, O.; Oyamada, S.;
Global Telecommunications Conference, 1995. GLOBECOM '95., IEEE , Volume: 2 , 13-17 Nov. 1995
Page(s): 1277 -1281 vol.2

[Abstract]   [PDF Full-Text (508 KB)] **IEEE CNF**

81 Planning-based visual programming system for sequence control
Namioka, Y.; Tsukimoto, H.; Mizutani, H.; Matsudaira, T.;
Artificial Intelligence for Applications, 1995. Proceedings., 11th Conference on , 20-23 Feb. 1995
Page(s): 186 -194

[Abstract]   [PDF Full-Text (804 KB)] **IEEE CNF**

82 A FMS to process elevators sheet metals
Kanamori, Y.; Kojima, K.; Okazaki, T.; Hashiguchi, N.;
Emerging Technologies and Factory Automation, 1995. ETFA '95, Proceedings.,

1995 INRIA/IEEE Symposium on , Volume: 3 , 10-13 Oct. 1995
Page(s): 375 -380 vol.3

[Abstract] [PDF Full-Text (260 KB)] **IEEE CNF**

---

83 **A 3.0 V 40 Mb/s hard disk drive read channel IC**
De Veirman, G.A.; Ueda, S.; Cheng, J.; Tam, S.; Fukahori, K.; Kurisu, M.;
Shinozaki, E.;
Solid-State Circuits, IEEE Journal of , Volume: 30 Issue: 7 , July 1995
Page(s): 788 -799

[Abstract] [PDF Full-Text (900 KB)] **IEEE JNL**

---

84 **ARCHGEN: Automated synthesis of analog systems**
Antao, B.A.A.; Brodersen, A.J.;
Very Large Scale Integration (VLSI) Systems, IEEE Transactions on , Volume: 3
Issue: 2 , June 1995
Page(s): 231 -244

[Abstract] [PDF Full-Text (1128 KB)] **IEEE JNL**

---

85 **A new approach to simulation debugging environment construction**
Zhongmin Yu; Aoki, Y.;
Industrial Electronics, Control, and Instrumentation, 1996., Proceedings of the
1996 IEEE IECON 22nd International Conference on , Volume: 3 , 5-10 Aug. 1996
Page(s): 1412 -1417 vol.3

[Abstract] [PDF Full-Text (768 KB)] **IEEE CNF**

---

86 **Autonomous minehunting and mapping technologies program**
autonomous maneuvering capabilities
Regan, R.A.;
OCEANS '96. MTS/IEEE. 'Prospects for the 21st Century'. Conference Proceedings
, Volume: 2 , 23-26 Sept. 1996
Page(s): 807 -812 vol.2

[Abstract] [PDF Full-Text (544 KB)] **IEEE CNF**

---

87 **Compiling object-oriented programs for distributed execution**
Muthukrishnan, P.K.; Bryant, B.R.; Zwarico, A.E.;
High Performance Computing, 1996. Proceedings. 3rd International Conference
on , 19-22 Dec. 1996
Page(s): 49 -54

[Abstract] [PDF Full-Text (464 KB)] **IEEE CNF**

---

88 **Automatic flow control planning for real-time image processing devices**
Melchert, W.;
Image Processing, 1996. Proceedings., International Conference on , Volume: 3 ,
16-19 Sept. 1996
Page(s): 643 -646 vol.3

[Abstract]   [PDF Full-Text (396 KB)] **IEEE CNF**

89 **Mapping statechart models onto an FPGA-based ASIP architecture**
Buchenrieder, K.; Pyttel, A.; Veith, C.;
Design Automation Conference, 1996, with EURO-VHDL '96 and Exhibition,
Proceedings EURO-DAC '96, European , 16-20 Sept. 1996
Page(s): 184 -189

[Abstract]   [PDF Full-Text (620 KB)] **IEEE CNF**

90 **An automated control logic generation method for plant sequential-control**
Ie, S.; Yamada, N.; Shinbori, T.;
Computer-Aided Control System Design, 1996., Proceedings of the 1996 IEEE
International Symposium on , 15-18 Sept. 1996
Page(s): 206 -211

[Abstract]   [PDF Full-Text (552 KB)] **IEEE CNF**

91 **Service specification description using extended message sequence charts between network and users**
Okamoto, M.; Niitsu, Y.;
Intelligent Network Workshop, 1996. IN '96., IEEE , 21-24 April 1996

[Abstract]   [PDF Full-Text (432 KB)] **IEEE CNF**

92 **Autonomous underwater vehicle control coordination using a tri-level hybrid software architecture**
Healey, A.J.; Marco, D.B.; McGhee, R.B.;
Robotics and Automation, 1996. Proceedings., 1996 IEEE International
Conference on , Volume: 3 , 22-28 April 1996
Page(s): 2149 -2159 vol.3

[Abstract]   [PDF Full-Text (772 KB)] **IEEE CNF**

93 **Annotations for synchronization constraints in CORBA IDL**
Henze, G.; Koch, T.; Kramer, B.;
Services in Distributed and Networked Environments, 1996., Proceedings of Third
International Workshop on , 3-4 June 1996
Page(s): 122 -128

[Abstract]   [PDF Full-Text (632 KB)] **IEEE CNF**

94 A software engineering experiment in software component generation

Kieburtz, R.B.; McKinney, L.; Bell, J.M.; Hook, J.; Kotov, A.; Lewis, J.; Oliva, D.P.; Sheard, T.; Smith, I.; Walton, L.;
Software Engineering, 1996., Proceedings of the 18th International Conference on , 25-30 March 1996
Page(s): 542 -552

[Abstract] [PDF Full-Text (984 KB)] **IEEE CNF**

95 A temporal access control mechanism for database systems

Bertino, E.; Bettini, C.; Ferrari, E.; Samarati, P.;
Knowledge and Data Engineering, IEEE Transactions on , Volume: 8 Issue: 1 , Feb. 1996
Page(s): 67 -80

[Abstract] [PDF Full-Text (1504 KB)] **IEEE JNL**

96 Integration of imaging pyrometry into the Wampum Plant automation project [cement plant]

Petrus, C.R.;
Cement Industry Technical Conference. 1997. XXXIX Conference Record., 1997 IEEE/PCA , 20-24 April 1997
Page(s): 419 -431

[Abstract] [PDF Full-Text (1224 KB)] **IEEE CNF**

97 Run-time scheduler synthesis for hardware-software systems and application to robot control design

Mooney, V.; Sakamoto, T.; De Micheli, G.;
Hardware/Software Codesign, 1997. (CODES/CASHE '97), Proceedings of the Fifth International Workshop on , 24-26 March 1997
Page(s): 95 -99

[Abstract] [PDF Full-Text (480 KB)] **IEEE CNF**

98 Functional verification of the superscalar SH-4 microprocessor

Biswas, P.; Freeman, A.; Yamada, K.; Nakagawa, N.; Uchiyama, K.;
Compcon '97. Proceedings, IEEE , 23-26 Feb. 1997
Page(s): 115 -120

[Abstract] [PDF Full-Text (468 KB)] **IEEE CNF**

99 Generating c de from hierarchical state-based requirements

Heimdahl, M.P.E.; Keenan, D.J.;
Requirements Engineering, 1997., Proceedings of the Third IEEE International Symposium on , 6-10 Jan. 1997
Page(s): 210 -219

[Abstract] [PDF Full-Text (856 KB)] **IEEE CNF**

100 **Automatic pr gramming of a time-optimal rob t controller and an anal g electrical circuit to implement the robot controller by means of genetic programming**
Koza, J.R.; Bennett, F.H., III; Keane, M.A.; Andre, D.;
Computational Intelligence in Robotics and Automation, 1997. CIRA'97., Proceedings., 1997 IEEE International Symposium on , 10-11 July 1997
Page(s): 340 -346

[Abstract] [PDF Full-Text (656 KB)] **IEEE CNF**

Journal or Magazine = **JNL**   Conference = **CNF**   Standard = **STD**

---

101 **A model of cerebellar learning for control of arm movements using muscle synergies**
Fagg, A.H.; Sitkoff, N.; Barto, A.G.; Houk, J.C.;
Computational Intelligence in Robotics and Automation, 1997. CIRA'97., Proceedings., 1997 IEEE International Symposium on , 10-11 July 1997
Page(s): 6 -12

[Abstract]   [PDF Full-Text (668 KB)] **IEEE CNF**

---

102 **Automatic test generation for the analysis of a real-time system: Case study**
Clarke, D.; Lee, I.;
Real-Time Technology and Applications Symposium, 1997. Proceedings., Third IEEE , 9-11 June 1997
Page(s): 112 -124

[Abstract]   [PDF Full-Text (1208 KB)] **IEEE CNF**

---

103 **Automated generation of communications software from service specifications described by state transition rules**
Takura, A.;
System Sciences, 1997, Proceedings of the Thirtieth Hawaii International Conference on , Volume: 1 , 7-10 Jan. 1997
Page(s): 472 -480 vol.1

[Abstract]   [PDF Full-Text (812 KB)] **IEEE CNF**

---

104 **G^{en}oM: a tool f r the specificati n and the implementation of operating modules in a distributed robot architecture**
Fleury, S.; Herrb, M.; Chatila, R.;
Intelligent Robots and Systems, 1997. IROS '97., Proceedings of the 1997

IEEE/RSJ International Conference on , Volume: 2 , 7-11 Sept. 1997
Page(s): 842 -849 vol.2

[Abstract]   [PDF Full-Text (748 KB)] **IEEE CNF**

---

105 **Automatic generation of C-code or PLD circuits under SFC graphical environment**
Ferreira, C.; Monteiro, S.; Monteiro, J.;
Industrial Electronics, 1997. ISIE '97., Proceedings of the IEEE International Symposium on , Volume: 1 , 7-11 July 1997
Page(s): SS181 -SS185 vol.1

[Abstract]   [PDF Full-Text (448 KB)] **IEEE CNF**

---

106 **TOGO-generating communication protocol implementations from formal specifications**
Naumann, F.; Simon, R.; Szczepanski, T.; Ulrich, A.;
Factory Communication Systems, 1997. Proceedings.1997 IEEE International Workshop on , 1-3 Oct. 1997
Page(s): 287 -296

[Abstract]   [PDF Full-Text (844 KB)] **IEEE CNF**

---

107 **VACANS-a tool for the validation of CAN-based applications**
Song, Y.Q.; Simonot-Lion, F.; Belissent, P.;
Factory Communication Systems, 1997. Proceedings.1997 IEEE International Workshop on , 1-3 Oct. 1997
Page(s): 381 -390

[Abstract]   [PDF Full-Text (760 KB)] **IEEE CNF**

---

108 **Automatic control-code generation from simulation for flexible material handling systems**
Chamis, C.D.; Ameduri, S.A.; Newman, W.S.;
Robotics and Automation, 1997. Proceedings., 1997 IEEE International Conference on , Volume: 3 , 20-25 April 1997
Page(s): 2139 -2144 vol.3

[Abstract]   [PDF Full-Text (720 KB)] **IEEE CNF**

---

109 **Cerebellar learning for control of a two-link arm in muscle space**
Fagg, A.H.; Sitkoff, N.; Barto, A.G.; Houk, J.C.;
Robotics and Automation, 1997. Proceedings., 1997 IEEE International Conference on , Volume: 3 , 20-25 April 1997
Page(s): 2638 -2644 vol.3

[Abstract]   [PDF Full-Text (672 KB)] **IEEE CNF**

110 **Visual envir nment for designing sequence c ntrol program with AI planning**
Namioka, Y.; Mizutani, H.;
Visual Languages, 1997. Proceedings. 1997 IEEE Symposium on , 23-26 Sept. 1997
Page(s): 430 -437

[Abstract]   [PDF Full-Text (1324 KB)] **IEEE CNF**

111 **Hybrid object-oriented real-time software development with VDM^{++}**
van Katwijk, J.; Durr, E.; Goldsack, S.;
Proceedings First IEEE International Conference Conference on Formal Engineering Methods , 12-14 Nov. 1997
Page(s): 17 -26

[Abstract]   [PDF Full-Text (824 KB)] **IEEE CNF**

112 **Automatic simulation to predict software architecture reliability**
Li, J.J.; Micallef, J.; Horgan, J.R.;
PROCEEDINGS The Eighth International Symposium On Software Reliability Engineering , 2-5 Nov. 1997
Page(s): 168 -179

[Abstract]   [PDF Full-Text (896 KB)] **IEEE CNF**

113 **A structured approach for synthesizing planners from specifications**
Biplav Srivastava; Subbarao Kambhampati; Mali, A.D.;
Automated Software Engineering, 1997. Proceedings., 12th IEEE International Conference , 1-5 Nov. 1997
Page(s): 18 -26

[Abstract]   [PDF Full-Text (800 KB)] **IEEE CNF**

114 **Automatic regeneration of sequence programs for operating plants**
Ikkai, Y.; Kakihara, K.; Ohkawa, T.; Komoda, N.; Doi, K.; Tone, I.;
Robotics & Automation Magazine, IEEE , Volume: 4 Issue: 2 , June 1997
Page(s): 20 -26

[Abstract]   [PDF Full-Text (1864 KB)] **IEEE JNL**

115 **Explanation based scenario generation for reactive system models**
Hall, R.J.;
Automated Software Engineering, 1998. Proceedings. 13th IEEE International Conference on , 13-16 Oct. 1998
Page(s): 115 -124

[Abstract]   [PDF Full-Text (284 KB)] **IEEE CNF**

116 **To maintain a reliable software specification**
Li, J.J.; Horgan, J.R.;
Software Reliability Engineering, 1998. Proceedings. The Ninth International
Symposium on , 4-7 Nov. 1998
Page(s): 59 -68

[Abstract]   [PDF Full-Text (48 KB)] **IEEE CNF**

117 **Semi-automatic generation of transfer functions for direct volume rendering**
Kindlmann, G.; Durkin, J.W.;
Volume Visualization, 1998. IEEE Symposium on , 19-20 Oct. 1998
Page(s): 79 -86, 170

[Abstract]   [PDF Full-Text (1392 KB)] **IEEE CNF**

118 **Techniques for systematically generating framework diagram based on UML**
Dong Kwan Kim; Kyo Taeg Jung; Chae Kyu Kim;
Software Engineering Conference, 1998. Proceedings. 1998 Asia Pacific , 2-4 Dec.
1998
Page(s): 203 -210

[Abstract]   [PDF Full-Text (92 KB)] **IEEE CNF**

119 **How to reconcile formal specifications and automatic programming: the Descartes system**
Lucas, J.-Y.; Dormoy, J.-L.; Ginoux, B.; Jimenez-Dominguez, C.; Pierre, L.;
Software Engineering Conference, 1998. Proceedings. 1998 Asia Pacific , 2-4 Dec.
1998
Page(s): 38 -45

[Abstract]   [PDF Full-Text (132 KB)] **IEEE CNF**

120 **An efficient control over human running animation with extension of planar hopper model**
Young-Min Kang; Sun-Jin Park; Ee-Taek Lee;
Computer Graphics and Applications, 1998. Pacific Graphics '98. Sixth Pacific
Conference on , 26-29 Oct. 1998
Page(s): 169 -176

[Abstract]   [PDF Full-Text (380 KB)] **IEEE CNF**

121 **A framework for the graphical specification and execution of c mplex signal pr cessing applications**
Sicheneder, A.; Bender, A.; Fuchs, E.; Mandl, R.; Sick, B.;

Acoustics, Speech, and Signal Processing, 1998. ICASSP '98. Proceedings of the 1998 IEEE International Conference on , Volume: 3 , 12-15 May 1998
Page(s): 1757 -1760 vol.3

[Abstract]   [PDF Full-Text (468 KB)] **IEEE CNF**

122 DESCARTES: an automatic programming system for algorithmically simple programs
Ginoux, B.; Dormoy, J.-L.; Jimenez-Dominguez, C.; Lucas, J.-Y.; Pierre, L.;
Software Specification and Design, 1998. Proceedings. Ninth International Workshop on , 16-18 April 1998
Page(s): 106 -115

[Abstract]   [PDF Full-Text (84 KB)] **IEEE CNF**

123 XFVHDL: a tool for the synthesis of fuzzy logic controllers
Lago, E.; Jimenez, C.J.; Lopez, D.R.; Sanchez-Solano, S.; Barriga, A.;
Design, Automation and Test in Europe, 1998., Proceedings , 23-26 Feb. 1998
Page(s): 102 -107

[Abstract]   [PDF Full-Text (132 KB)] **IEEE CNF**

124 Toward automatic detection of software failures
Savor, T.; Seviora, R.E.;
Computer , Volume: 31 Issue: 8 , Aug. 1998
Page(s): 68 -74

[Abstract]   [PDF Full-Text (112 KB)] **IEEE JNL**

125 An ALF communication architecture: design and automated implementation
Chrisment, I.; Kaplan, D.; Diot, C.;
Selected Areas in Communications, IEEE Journal on , Volume: 16 Issue: 3 , April 1998
Page(s): 332 -344

[Abstract]   [PDF Full-Text (188 KB)] **IEEE JNL**

126 The SHIFT programming language for dynamic networks of hybrid automata
Deshpande, A.; Gollu, A.; Semenzato, L.;
Automatic Control, IEEE Transactions on , Volume: 43 Issue: 4 , April 1998
Page(s): 584 -587

[Abstract]   [PDF Full-Text (136 KB)] **IEEE JNL**

127 **Teaching by demonstration in virtual reality-specification of preparation m tion based n a virtual small face and an artificial constrained motion primitives**
Onda, H.;
Systems, Man, and Cybernetics, 1999. IEEE SMC '99 Conference Proceedings. 1999 IEEE International Conference on , Volume: 3 , 12-15 Oct. 1999
Page(s): 1095 -1100 vol.3

[Abstract]   [PDF Full-Text (476 KB)] **IEEE CNF**

128 **Model driven automatic unit testing technology tool architecture**
Toeppe, S.; Ranville, S.;
Digital Avionics Systems Conference, 1999. Proceedings. 18th , Volume: 2 , 24-29 Oct. 1999
Page(s): 10.A.4-1 -10.A.4-11 vol.2

[Abstract]   [PDF Full-Text (900 KB)] **IEEE CNF**

129 **Practical validation of model based code generation for automotive applications**
Toeppe, S.; Ranville, S.; Bostic, D.; Wang, Y.;
Digital Avionics Systems Conference, 1999. Proceedings. 18th , Volume: 2 , 24-29 Oct. 1999
Page(s): 10.A.3-1 -10.A.3-14 vol.2

[Abstract]   [PDF Full-Text (840 KB)] **IEEE CNF**

130 **A simulator-optimizer for the design of very low phase noise CMOS LC-oscillators**
De Muer, B.; De Ranter, C.; Crols, J.; Steyaert, M.;
Electronics, Circuits and Systems, 1999. Proceedings of ICECS '99. The 6th IEEE International Conference on , Volume: 3 , 5-8 Sept. 1999
Page(s): 1557 -1560 vol.3

[Abstract]   [PDF Full-Text (344 KB)] **IEEE CNF**

131 **Generation of Boolean logic equations for discrete logic control**
Kamen, E.W.;
Emerging Technologies and Factory Automation, 1999. Proceedings. ETFA '99. 1999 7th IEEE International Conference on , Volume: 2 , 18-21 Oct. 1999
Page(s): 1541 -1545 vol.2

[Abstract]   [PDF Full-Text (300 KB)] **IEEE CNF**

132 **An object-oriented formal m del for s ftware project management**
Jyhjong Lin; Chunshou Yeh;
Software Engineering Conference, 1999. (APSEC '99) Proceedings. Sixth Asia Pacific , 7-10 Dec. 1999
Page(s): 552 -559

[Abstract]   [PDF Full-Text (628 KB)] **IEEE CNF**

---

133 **Proposal of a support system for device driver generati n**
Katayama, T.; Saisho, K.; Fukuda, A.;
Software Engineering Conference, 1999. (APSEC '99) Proceedings. Sixth Asia Pacific , 7-10 Dec. 1999
Page(s): 494 -497

[Abstract]   [PDF Full-Text (264 KB)] **IEEE CNF**

---

134 **A formal approach to reactive system design: unmanned aerial vehicle flight management system design example**
Koo, T.J.; Sinopoli, B.; Sangiovanni-Vincentelli, A.; Sastry, S.;
Computer Aided Control System Design, 1999. Proceedings of the 1999 IEEE International Symposium on , 22-27 Aug. 1999
Page(s): 522 -527

[Abstract]   [PDF Full-Text (656 KB)] **IEEE CNF**

---

135 **Software architectures for OSEK/VDX applications using MATRIX$_X$ ^{TM} and AutoCode^{TM}**
Martin, T.A.;
Computer Aided Control System Design, 1999. Proceedings of the 1999 IEEE International Symposium on , 22-27 Aug. 1999
Page(s): 231 -236

[Abstract]   [PDF Full-Text (500 KB)] **IEEE CNF**

---

136 **JGram: rapid development of multi-agent pipelines for real-world tasks**
Sukthankar, R.; Brusseau, A.; Pelletier, R.; Stockton, R.;
Agent Systems and Applications, 1999 and Third International Symposium on Mobile Agents. Proceedings. First International Symposium on , 3-6 Oct. 1999
Page(s): 30 -40

[Abstract]   [PDF Full-Text (100 KB)] **IEEE CNF**

---

137 **VHDL placement directives for parametric IP blocks**

1 Flexible access control policy specification with constraint logic programming ◼

Steve Barker, Peter J. Stuckey
November 2003 **ACM Transactions on Information and System Security (TISSEC),** Volume 6 Issue 4
Full text available: 🗎 pdf(421.66 KB)   Additional Information: full citation, abstract, references, index terms

We show how a range of role-based access control (RBAC) models may be usefully represented as constraint logic programs, executable logical specifications. The RBAC models that we define extend the "standard" RBAC models that are described by Sandhu et al., and enable security administrators to define a range of access policies that may include features, like denials of access and temporal authorizations, that are often useful in practice, but which are not widely supported in existing access co ...

Keywords: Role-based access control, constraint logic programming

2 Specification and dialogue control of visual interaction through visual rewriting systems ◼

P. Bottoni, M. F. Costabile, P. Mussio
November 1999 **ACM Transactions on Programming Languages and Systems (TOPLAS),** Volume 21 Issue 6
Full text available: 🗎 pdf(886.71 KB)   Additional Information: full citation, abstract, references, citings, index terms, review

Computers are increasingly being seen not only as computing tools but more so as communication tools, thus placing special emphasis on human-computer interaction (HCI). In this article, the focus is on visual HCI, where the messages exchanged between human and computer are images appearing on the computer screen, as usual in current popular user interfaces. We formalize interactive sessions of a human-computer dialogue as a structured set of legal visual sentences, i.e., as a visual languag ...

Keywords: control automaton, dialogue control, visual languages

3 Access Control Policies and Specifications: An access control language for web services

Emin Gün Sirer, Ke Wang

June 2002 **Proceedings of the seventh ACM symposium   n Access control models and technologies**

Full text available: pdf(253.08 KB)   Additional Information: full citation, abstract, references, citings, index terms

This paper presents an approach for formally specifying and enforcing security policies on web service implementations. Networked services in general, and web services in particular, require extensive amounts of code to ensure that clients respect site-integrity constraints. We provide a language by which these constraints can be expressed and enforced automatically, portably and efficiently. Security policies in our system are specified in a language based on temporal logic, and are processed b ...

Keywords: access control, web services

4 Specification languages for control programs

Joseph H. Austin

January 1973 **ACM SIGPLAN Notices , Proceeding of ACM SIGPLAN - SIGOPS interface meeting on Programming languages - operating systems**, Volume 8 Issue 9

Full text available: pdf(191.14 KB)   Additional Information: full citation, abstract, references, index terms

This study (1) describes an approach to the formal specification of control programs based on the generalized concept of binding. From this viewpoint, the individual operations of a control program may be described by a graphic specification language [related to mem-theory (2)], whose statements are pairs of graphs depicting the original and final binding states of system elements. A global view of interrelationships and dynamic behavior of the system may be described by an extension of Pet ...

5 Formal specification for a clinical cyclotron control system

Jonathan Jacky

April 1990 **ACM SIGSOFT Software Engineering Notes , Conference proceedings on Formal methods in software development**, Volume 15 Issue 4

Full text available: pdf(1.15 MB) Additional Information: full citation, references, index terms

6 Specification, verification, and synthesis of concurrency control components

Tuba Yavuz-Kahveci, Tevfik Bultan

July 2002 **ACM SIGSOFT Software Engineering Notes , Proceedings of the international symposium on Software testing and analysis**, Volume 27 Issue 4

Full text available: pdf(315.84 KB)   Additional Information: full citation, abstract, references

Run-time errors in concurrent programs are generally due to the wrong usage of synchronization primitives such as monitors. Conventional validation techniques such as testing become ineffective for concurrent programs since the state space increases exponentially with the number of concurrent processes. In this paper, we propose an approach in which 1) the concurrency control component of a concurrent program is formally specified, 2) it is verified automatically using model checking, and 3) the ...

Keywords: concurrent programming, infinite-state model checking, monitors, specification languages

**7** A review of human factors research on programming languages and specifications

Bill Curtis

March 1982 **Proceedings of the 1982 conference on Human factors in computing systems**

Full text available: 📄 pdf(651.67 KB)   Additional Information: full citation, abstract, references, citings, index terms

This paper presents a partial review of the human factors work on computer programming. It begins by giving an overview of the behavioral science approach to studying programming. Because of space limitations this review will concentrate on cognitive models of programmer problem solving and the experimental research on language characteristics and specification formats. Areas not reviewed include debugging, programming teams, individual differnces, and research methods. The conclusions disc ...

**8** Parallel programming with control abstraction

Lawrence A. Crowl, Thomas J. LeBlanc

May 1994 **ACM Transactions on Programming Languages and Systems (TOPLAS)**, Volume 16 Issue 3

Full text available: 📄 pdf(3.68 MB)   Additional Information: full citation, abstract, references, index terms, review

Parallel programming involves finding the potential parallelism in an application and mapping it to the architecture at hand. Since a typical application has more potential parallelism than any single architecture can exploit effectively, programmers usually limit their focus to the parallelism that the available control constructs express easily and that the given architecture exploits efficiently. This approach produces programs that exhibit much less parallelism that exists in the applic ...

Keywords: architectural adaptability, closures, control abstraction, data abstraction, early reply, multiprocessors, parallel programming languages, performance tuning

9 Preliminary experience with a configuration control system for modular programs

J. Estublier, S. Ghoul, S. Krakowiak

April 1984 **Proceedings of the first ACM SIGSOFT/SIGPLAN software engineering symposium on Practical software development environments**, Volume 9 , 19 Issue 3 , 5

Full text available: 📄 pdf(600.34 KB)   Additional Information: full citation, abstract, references, citings, index terms

This paper describes some preliminary experience gathered during the implementation and early use of a program composition and version control system. This system has been designed and implemented as a part of the Adele research project, a programming environment for the production of modular programs (Estublier 83). This project has four main components: a) a program editor, interpreter and debugger; b) a parameterized code generator; c) a user interface; d) a program base, the subject of ...

10 Panther: a specification system for graphical controls

J. I. Helfman

May 1986 **ACM SIGCHI Bulletin , Proceedings of the SIGCHI/GI conference on Human factors in c mputing systems and graphics interface,** Volume 17 Issue SI

Full text available: pdf(571.65 KB)   Additional Information: full citation, abstract, references, citings, index terms

An experimental graphical control specification system, called Panther, has been written in C for UNIX®-based applications. Unlike similar systems, which focus on combining interaction techniques, Panther allows the specification of low-level interactions by invoking user-selectable subroutines for input-device transitions. A Panther interface is specified in a textual table as a set of hierarchically nested regions. Regions can model any control device, such as menu bu ...

Keywords: graphical controls, graphical interface specification, graphical user interfaces

11 Automated derivation of program control structure from natural language program descriptions

David Wile, Robert Balzer, Neil Goldman

August 1977 **Proceedings of the 1977 symposium on Artificial intelligence and programming languages,** Volume 12 , Issue 8 , 64

Full text available: pdf(664.40 KB)   Additional Information: full citation, abstract, references, citings, index terms

This paper describes a system which organizes a natural language description of a program into a conventional program control structure, as a part of a larger system for converting informal natural language program specifications into running programs. Analysis of the input program fragments using a model of a human "reader" of specifications has been found to be a very successful adjunct to conventional "planning" methodologies. Natural language descripti ...

12 Proper termination of flow-of-control in programs involving concurrent processes

Kim Gostelow, Vincent G. Cerf, Gerald Estrin, Saul Volansky

August 1972 **Proceedings of the ACM annual conference - Volume 2**

Full text available: pdf(743.31 KB)   Additional Information: full citation, abstract, references, citings, index terms

This paper presents new results from a study of flow-of-control in programs involving concurrent processes. Within the framework of flow-of-control, this paper: 1) defines a property of parallel program behavior called proper termination (PT); 2) shows that any properly terminating program containing a specification of the resources it requires will be free of deadlock; 3) identifies other important features of PT programs; and < ...

Keywords: Correctness, Deadlock detection, Parallel program schemata, Resource allocation

13 Configuration control in an Ada programming support environment

Mark Marcus, Kirk Sattley, C. Mugur Stefanescu

March 1987 **Proceedings of the Joint Ada conference fifth national conference on Ada technology and fourth Washington Ada Symposium**

Full text available: pdf(979.96 KB)   Additional Information: full citation, references, citings, index terms

14 <u>Use of a Nonprocedural Specification Language and Associated Program Generator in Software Development</u>

N. S. Prywes, Amir and S. Shastry

October 1979 **ACM Transactions on Programming Languages and Systems (TOPLAS),** Volume 1 Issue 2

Full text available: pdf(1.29 MB)   Additional Information: full citation, abstract, references, citings, index terms

The Model II language and the associated program generator are used to explain and illustrate the use of very high level nonprocedural languages for computer programming. The effect of a very high level language is obtained in Model II through the elimination of procedural and control facilities that exist in high level programming languages such as PL/I or Cobol. In particular, the statements may be given in any order and there are no control constructs such as input/output, iterations, an ...

15 <u>Real-time programming specifications</u>

R. V. Head

July 1963 **Communications of the ACM,** Volume 6 Issue 7

Full text available: pdf(1.28 MB)   Additional Information: full citation, references, citings

16 <u>TOMAL-a high-level programming language for microprocessor process control applications</u>

R. B. Kieburtz, J. L. Hennessy

March 1976 **ACM SIGPLAN Notices , Proceedings of the ACM SIGMINI/SIGPLAN interface meeting on Programming systems in the small processor environment,** Volume 11 Issue 4

Full text available: pdf(634.73 KB)   Additional Information: full citation, abstract, references, citings, index terms

This paper describes the multi-tasking capabilities of a new microprocessor programming language that has been designed to support process control applications. A program in TOMAL is a collection of tasks, priority ordered, and possibly having real-time response constraints and internal synchronization statements. It also supports device-independent I/O programming, by allowing the characteristics of each external device to be given in a declaration. A TOMAL source program is translated int ...

17 <u>Validating programs without specifications</u>

W. Howden

November 1989 **ACM SIGSOFT Software Engineering Notes , Proceedings of the ACM SIGSOFT '89 third symposium on Software testing, analysis, and verification,** Volume 14 Issue 8

Full text available: pdf(1.08 MB)   Additional Information: full citation, abstract, references, index terms

This work was supported by the Office of Naval Research and the Naval Weapons Center

18 High level specification of concurrency control in distributed database systems

L. Chiu, M. T. Liu

April 1988 **Proceedings of the 10th international conference on Software engineering**

Full text available: pdf(1.00 MB)   Additional Information: full citation, abstract, references, index terms

Concurrency control is one of the major issues in database systems; therefore, many concurrency control algorithms based on different strategies have been proposed. Unfortunately there is still lack of a general model for describing these algorithms. Hence, algorithms cannot be uniformly presented, which makes it hard to understand them and to prove their correctness. This paper proposes a high level specification, based on an object-oriented model, of concurrency control algorithms. Concur ...

19 Gypsy: A language for specification and implementation of verifiable programs

Allen L. Ambler, Donald I. Good, James C. Browne, Wilhelm F. Burger, Richard M. Cohen, Charles G. Hoch, Robert E. Wells

March 1977 **Proceedings of an ACM conference on Language design for reliable software**, Volume 12 , 2 , 11 Issue 3 , 2 , 2

Full text available: pdf(896.59 KB)   Additional Information: full citation, abstract, references, citings, index terms

An introduction to the Gypsy programming and specification language is given. Gypsy is a high-level programming language with facilities for general programming and also for systems programming that is oriented toward communications processing. This includes facilities for concurrent processes and process synchronization. Gypsy also contains facilities for detecting and processing errors that are due to the actual running of the program in an imperfect environment. The specification facilit ...

Keywords: Communications processing, Concurrency, Formal specification, Program proof, Programming language, Run time validation, Specification language, Systems programming, Verification

20 Asynchronous transfer of control in the real-time specification for java™

Benjamin M. Brosgol, Ricardo J. Hassan, Scott Robbins

April 2002 **ACM SIGAda Ada Letters , Proceedings of the 11th international workshop on Real-time Ada workshop**, Volume XXII Issue 4

Full text available: pdf(247.20 KB)   Additional Information: full citation, abstract, references

The Real-Time Specification for Java provides a facility for Asynchronous Transfer of Control based on exception handling and a generalization of the interrupt() method from the Thread class. This mechanism allows the programming of useful idioms such as timeouts and thread termination without the latency found in polling, and it avoids the problems inherent in the Thread class's stop() and destroy() methods.

1 Flowcharts versus program design languages: an experimental comparison ⬛
H. Rudy Ramsey, Michael E. Atwood, James R. Van Doren
June 1983 **Communications of the ACM**, Volume 26 Issue 6

Full text available: 📄 pdf(781.98 KB)   Additional Information: full citation, abstract, references, citings, index terms

An experiment was performed to assess the relative merits of program design languages (PDLs) and flowcharts as techniques for the development and documentation of detailed designs for computer programs. The use of a PDL by a software designer, for the development and description of a detailed program design, produced better results than did the use of flowcharts. Specifically, the designs appeared to be of significantly better quality, involving more algorithmic or procedural detail ...

Keywords: behavioral research, flowcharts, human factors, program design languages, software design, software documentation

2 Experimental investigations of the utility of detailed flowcharts in programming ⬛
Ben Shneiderman, Richard Mayer, Don McKay, Peter Heller
June 1977 **Communications of the ACM**, Volume 20 Issue 6

Full text available: 📄 pdf(917.31 KB)   Additional Information: full citation, abstract, references, citings

This paper describes previous research on flowcharts and a series of controlled experiments to test the utility of detailed flowcharts as an aid to program composition, comprehension, debugging, and modification. No statistically significant difference between flowchart and nonflowchart groups has been shown, thereby calling into question the utility of detailed flowcharting. A program of further research is suggested.

Keywords: debugging, experimental testing, flowcharts, human factors, modification, program composition, program comprehension

3 FLOWTRACE, a computer program for flowcharting programs ⬛
Philip M. Sherman

December 1966 **Communicati ns of the ACM,** Volume 9 Issue 12

Full text available: 📄 pdf(1.13 MB) Additional Information: full citation, abstract, references, citings

The FLOWTRACE system produces flowcharts of programs written in "almost any" programming language. One must describe the syntax of the control statements in his language; for this purpose a metalanguage is available. The resultant object deck is used to flowchart any programs in the language described. Several examples of FAP and SNOBOL flowcharts are given. However, it is not necessary to confine one's scope to existing languages. One may define his own language in a ...

4   On the Complexity of Flowchart and Loop Program Schemes and Programming Languages

H. B. Hunt
January 1982 **Journal of the ACM (JACM),** Volume 29 Issue 1

Full text available: 📄 pdf(934.49 KB) Additional Information: full citation, references, citings, index terms

5   What is a flowchart loop and about structured programming

Karel Culik
January 1980 **ACM SIGPLAN Notices,** Volume 15 Issue 1

Full text available: 📄 pdf(775.88 KB) Additional Information: full citation, references

6   A comparative sampling of the systems for producing computer-drawn flowcharts

Marshall D. Abrams
January 1968 **Proceedings of the 1968 23rd ACM national conference**

Full text available: 📄 pdf(431.55 KB) Additional Information: full citation, abstract, references, index terms

In the current usage, complete flowcharts are generally drawn after an algorithm has been coded in a program part, not before. The functions of post-programming flowcharting are debugging and documentation. In both cases it is important to know the path of control through the program and the computations and other actions taken as directed by this flow of control; in short, it is important to know what the program does! Unless special controls are enforced, or unless the programmer is espec ...

7   Whither flowcharting?

Frederick A. Hosch
February 1977 **ACM SIGCSE Bulletin , Proceedings of the eighth SIGCSE technical symposium on Computer science education,** Volume 9 Issue 3

Full text available: 📄 pdf(429.34 KB) Additional Information: full citation, abstract, references, index terms

During the past few years, a growing number of authors have begun to take exception to the previously unquestioned use of flowcharts as a program development tool. These criticisms of the traditional flowcharting methodology center around the claim that flowcharts, like goto's, belong to the class of objects that are detrimental to good programming. Suggested alternatives range from developing programs entirely in well-structured high level languages to replacing conv ...

8 An Assessment of Techniques for Proving Program Correctness
Bernard Elspas, Karl N. Levitt, Richard J. Waldinger, Abraham Waksman
June 1972 **ACM Computing Surveys (CSUR),** Volume 4 Issue 2
Full text available: pdf(4.36 MB) Additional Information: full citation, references, citings, index terms

9 Flowcharting With the ANSI Standard: A Tutorial
Ned Chapin
June 1970 **ACM Computing Surveys (CSUR),** Volume 2 Issue 2
Full text available: pdf(2.22 MB) Additional Information: full citation, references, citings, index terms

10 Structured programming in Cobol: an approach for application programmers
Allen van Gelder
January 1977 **Communications of the ACM,** Volume 20 Issue 1
Full text available: pdf(1.05 MB) Additional Information: full citation, abstract, references, citings

Techniques for designing and writing Cobol programs are presented. Previous work in structured programming is drawn upon and adapted. The presentation is informal: the terminology is nonmathematical as far as possible, no theorems are proved, and examples are used frequently. Top-down program design is implemented through the use of structured flowcharts, disciplined specifications, and step by step verification. A well-formed Cobol program is defined. The proper use of the GO TO and other ...

Keywords: Cobol, GO TO statement, application programming, flowchart, program verification, repeat statement, software reliability, structured programming, top-down, well-formed program

11 Degrees of translatability and canonical forms in program schemas: Part I
Ashok K. Chandra
April 1974 **Proceedings of the sixth annual ACM symposium on Theory of computing**
Full text available: pdf(780.27 KB) Additional Information: full citation, abstract, references, citings, index terms

We define a measure of the generality of the control structure of a program schema. This imposes a partial ordering on program schemas, and leads to a concept of the "difficulty" of a programming problem. In this sense there exists a "hardest" flowchart program, recursive program etc. Some earlier proofs can also be simplified and/or clarified by this approach.

12 On the emulation of flowcharts by decision tables
Art Lew
December 1982 **Communications of the ACM,** Volume 25 Issue 12
Full text available: pdf(1.13 MB) Additional Information: full citation, abstract, references, citings, index terms

Any flowchart can be emulated by a decision table, whose complexity depends on that of the flowchart. It may be necessary, however, to introduce a new control variable with associated tests and sets or to permit changes in execution sequences provided action-test independence holds. Two measures of decision table complexity are discussed and interrelated. Finally, conditions and procedures

for reducing complexity are presented.

Keywords: conversion of flowcharts, tabular programming language

13 Compilation of Acyclic Smooth Programs for Parallel Execution

Otto C. Juelich, Clinton R. Foulk

January 1981 **ACM Transactions on Programming Languages and Systems (TOPLAS)**, Volume 3 Issue 1

Full text available: ▦ pdf(1.26 MB) Additional Information: full citation, references, index terms

14 An Overview of Programming Practices

J. M. Yohe

December 1974 **ACM Computing Surveys (CSUR)**, Volume 6 Issue 4

Full text available: ▦ pdf(1.86 MB) Additional Information: full citation, references, citings, index terms

15 Efficient reducibility between programming systems (Preliminary Report)

Nancy A. Lynch, Edward K. Blum

May 1977 **Proceedings of the ninth annual ACM symposium on Theory of computing**

Full text available: ▦ pdf(870.42 KB)   Additional Information: full citation, abstract, references, citings, index terms

Much of the research on semantic theories has concentrated on qualitative properties such as definability (of such programming concepts as recursive procedures), equivalence (of different language constructs), and verifiability (of the correctness, or consistency, of one expression relative to another). Current qualitative theories are in a tentative state and much remains to be done. However, there is also a quantitative side to semantics. Indeed, many of the questions which any semantic t ...

16 TWO-D: The USF Beginner's Two-Dimensional Programming System

James N. Haag, Michael A. Kelly, Paul F. Sherman

October 1972 **ACM SIGPLAN Notices , Proceedings of the symposium on Two-dimensional man-machine communication**, Volume 7 Issue 10

Full text available: ▦ pdf(657.22 KB)   Additional Information: full citation, abstract, index terms

A programming system, permitting the user to think 100% that he is programming with flowchart symbols, is described. This description includes the TWO-D syntax, the user's view-point, the CRT-terminal output, the overall structure of the simply-designed programming system, the file structure used, some design decisions faced, and the flowchart of the supervisory program.

17 A review of human factors research on programming languages and specifications

Bill Curtis

March 1982 **Proceedings of the 1982 conference on Human factors in c mputing systems**

Full text available: ▦ pdf(651.67 KB)   Additional Information: full citation, abstract, references, citings, index terms

This paper presents a partial review of the human factors work on computer programming. It begins by giving an overview of the behavioral science approach to studying programming. Because of space limitations this review will concentrate on cognitive models of programmer problem solving and the experimental research on language characteristics and specification formats. Areas not reviewed include debugging, programming teams, individual differnces, and research methods. The conclusions disc ...

18 Use of structured flowcharts in the undergraduate Computer Science curriculum

R. E. Haskell, D. E. Boddy, G. A. Jackson

July 1976 **ACM SIGCSE Bulletin , Proceedings of the sixth SIGCSE technical symposium on Computer science education,** Volume 8 Issue 3

Full text available: pdf(372.06 KB)   Additional Information: full citation, abstract, references, index terms

Over the last four years a new Computer Science major program has been introduced into the curriculum of the School of Engineering at Oakland University. During this period computer science educators throughout the country have debated the best way to introduce structured programming into the curriculum. There is now a widespread belief that beginning FORTRAN courses cannot be taught using structured programming in a form that is palatable to freshmen students without the aid of a structure ...

19 Development of computer programs by problem analysis Diagram(PAD)

Y. Futamura, T. Kawai, H. Horikoshi, M. Tsutsumi

March 1981 **Proceedings of the 5th international conference on Software engineering**

Full text available: pdf(485.37 KB)   Additional Information: full citation, abstract, references, citings, index terms

A new tree-structured diagram for describing computer program logics is presented. The diagraming technique called PAD(Problem Analysis Diagram) is used as basis in establishing method of coding, testing, and data type description. It is proposed as a functionally superior substitute for flowcharts. The fact that some 1000 HITACHI programmers have converted from flowcharts to PAD within the last 15 months is indicative of the broad potential utility of this notation.

20 Enumeration of structured flowcharts

Edward A. Bender, Jon T. Butler

July 1985 **Journal of the ACM (JACM),** Volume 32 Issue 3

Full text available: pdf(693.34 KB)   Additional Information: full citation, abstract, references, index terms, review

An analysis of structured flowcharts is presented, where size is measured by the number, n, of decision nodes (IF-THEN-ELSE and DO-WHILE nodes). For all classes of structured flowcharts considered, the number of charts is approximately, $cn-3/2 \ggr n$, for large n, where c>and $\ggr$ are parameters that depend on the class. It is also shown that most l ...
